

Ascension is a large, open-platform survival game created with p5.js and p5.play. The player controls a lone astronaut navigating a sprawling vertical outpost filled with floating platforms, hazards, and hostile drones. Unlike traditional platformers, the design emphasizes upward traversal and survival across multiple layers of the environment. To make climbing more accessible, the game introduces double jumps, jump pads, ladders, and moving platforms, ensuring players can scale the outpost without frustration while still facing meaningful challenges.

Top Zone (high difficulty)

[Drone Patrol] [Vent Hazard] [Moving Platform]

==== ==== =====

Ladder ↑

[Jump Pad] [Upgrade Module] [Oxygen Canister]

_____ (o)

Mid Zone (checkpoint safe area)

[Checkpoint] [Static Platform Cluster]

Bottom Zone (spawn area)

Player Start

HUD: Score | Lives 3 | Scale 1.06 | Stamina

Bottomless Void (fall = lose life)
